## Let's go on TRASH DIET!

Raw garbage stinks and weighs a lot especially this season, doesn't it? Moisture makes up roughly 70% of raw garbage. You can solve this problem by 2 easy habits!

- ① Squeeze the raw garbage
- ② Discard parts you cannot eat only.

## Japanese Encephalitis Vaccines (JEV or *Nihon Nōen Wakuchin*)

JE is contagious to humans through bites from infected mosquitoes. 20 – 40 percent of patients die and the rest will suffer from severe permanent damage such as movement disorders. There is no antiviral treatment for patients with JE.

- First term (3 shots) for those who are between a day younger than 6 months old and a day younger than 7 years and 6 months old (Notice will be handed to each individual at the medical checkups for 3-year-olds or mailed.)
- Second term (the 4th shot) for those who are between a day younger than 9 years old and a day younger than 13 years old.

Citizens who are under 20 years old (up until the day before the individual turns 20 years old) can take the shot. Go to one of the designated medical institutions in Fujinomiya to take JEV.

If you prefer clinics out of Fujinomiya city, please consult the Health Enhancement Division (*Kenkō Zōshin-ka*).
