Let's Connect to Public Sewer Pipes

Public sewer pipes are important facilities, which are essential for nature and people to spend healthy and convenient lives. If you live in an area, which has completed sewer pipes...

① In case you use vault toilets, please reorganize your current ones into flush toilets which has been connected to a public sewer pipe within 3 years.

② In case you use tanks for excretion / septic tanks, please connect your drainage such as kitchen, bath and restroom to public sewer pipes.

If you would like to have constructions like ① and ②, please ask a construction store designated by Fujinomiya City with your own expense. You can check the store list at the window of sewage division or in the website of Fujinomiya City.

When you are connected to sewer pipes, it would cost you sewage rate charge. This charge will be used as maintenance cost for repair and cleaning of sanitary drainage. Basically, Fujinomiya City takes the amount of wastewater as the amount of water consumption. The city would ask your payment every two months with your water charge.
