新型コロナウイルスワクチン接種について

Vaccinations make you harder to get infected, and even if you get infected, it is more effective in preventing serious disease.

Number of infected people

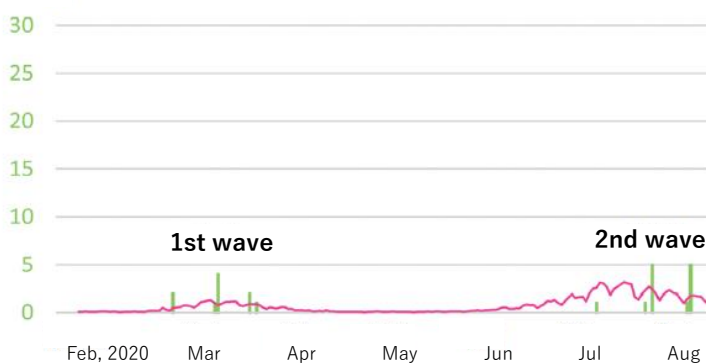

Up to 22 August 2021, the number of people infected with COVID-19 in Fujinomiya city was 358.

Nationwide, there have been five waves of outbreaks, but in the fourth wave from March to May this year, the city was able to control the number of cases and prevent the spread of the disease.

However, in the fifth wave which began in July, has seen an explosion of infections caused by the highly infectious delta variant in many parts of Japan, the number of people infected in the city increasing at an unprecedented rate.

It is important that each of us acts with caution to protect our own and our families' lives.

To reduce the spread of infection

Thorough prevention of infection, even after vaccination.

Vaccinated people may be asymptomatic and act unaware of the infection and spread it.

Even if you have been vaccinated, it is important to take precautions to prevent infection and to avoid spreading it to your family and others.

Avoid going out unnecessarily, without an emergency.

Do not have meals except with family members who live with you.

In Our Daily Lives

Just a little bit of effort from each of us can lead to more gentle lives for others. Why don't we start with what we can do and bring it into our daily lives?

Yasashii Nihongo (Easy Japanese)

Easy Japanese is a Japanese that is rephrased in a way that is easy to understand for foreigners, children, the elderly, and people with disabilities.

Speak clearly.

For foreigners, we should be especially clear in saying "yes or no" and "good or bad". Double negatives and roundabout expressions are difficult to understand and should not be used.

[Example]
