☎ 0544-22-1457 FAX 0544-22-1277

COVID-19 will be downgraded to Category 5

COVID-19 was considered high risk due to its infectiousness and severe symptoms when it occurs, and was ranked as the "Pandemic Influenza" (equivalent to Category 2), which will be downgraded to "Category 5" on May 8, 2023.

Risk	Category of Infectious Diseases		Name of Infectious Diseases
	Category		
High ↑ Risk ↓ Low	Category 1		Ebola hemorrhagic fever, Plague, etc.
	Category 2		Tuberculosis, etc.
	Pandemic Influenza		Pandemic Influenza, COVID-19
	Category 3		Cholera, Bacterial dysentery, etc.
	Category 4		Malaria, Rabies, etc.
	Category 5		Seasonal influenza, COVID-19

Continue to take basic infection control measures.

Even downgraded to category 5, the risk of infection does not change. Please continue to take basic infection control measures such as "Wash hands frequently", "Ventilate frequently", "Sanitize hands", and "Avoid the 3 Cs (Closed spaces / Crowded places / Close-contact settings)".

The standard for wearing masks will be changed.

From March 13 (Monday), wearing a mask will be an individual's decision. However, in order to prevent infections, please wear a mask as much as possible in the following situations.

When visiting a medical institution or facility for seniors

When taking a crowded train or bus

If a person with fever or other symptoms, or a person infected with COVID-19 needs to go out for hospital visits or other reasons, please be careful not to spread the infection by avoiding crowds, wearing a mask, and so on.

Please consider vaccinations.

Vaccinations have been shown to reduce the risk of severe disease and death. If you have received your vaccination ticket, please consider getting vaccinated as early as possible.

From now on, vaccinations are being considered for around the fall and winter.

Be prepared for infections.

Even if you have fever or other symptoms, you may not be able to see a doctor if medical facilities are crowded.

As a general rule, those who are infected but asymptomatic or mildly ill will be recuperated at home. It is important to be prepared in advance for sudden recuperation at home.

Fever reducer, painkiller, cold medicine

Coronavirus test kit

Food and daily use items for 7 days

Items to cool the head or body

If you have any concerns, please contact us.

If you are recuperating at home or have any concerns about infection and need some help, please consult with us.

If you have any concerns about your health...

Every year, get a vaccination against rabies.

If bitten or scratched by a dog infected with rabies, the virus can enter the body through the wound and cause death.

It is a scary disease that kills almost 100% of those who develop it.

It occurs in almost all areas of the world and kills 50,000 to 60,000 people each year. Although there is currently no outbreak in Japan, the threat of rabies is always around us due to the flow of people and products from overseas.

Outbreaks of rabies can be prevented by having dogs vaccinated against rabies.

Owners are obligated to vaccinate their registered dogs every year, and put the vaccination certificate (plate), which is issued after vaccination, on the dog's collar.

Eligibility Dogs over 91 days old

What to bring

- Pet dog owner's handbook (Aiken Techo)
- Notification postcard*

* All registered dog owners will receive it in late March.

Fee 3,500 yen (vaccination fee, vaccination certificate issuance fee)

Others Group vaccinations are not available. Please have vaccinations at an animal hospital.

If you cannot go to a hospital.

Some animal hospitals may be able to make house calls. Please contact them directly.

If your dog got a vaccination at an animal hospital outside of the city

The vaccination certificate (plate) will be issued at the city hall.

Fee 550 yen (vaccination certificate issuance fee)

What to bring Rabies Vaccination Certificate issued by a hospital outside the city.
